company Butte Falls School District

Please consider this proposal as it would be tremendously helpful to the citizens who reside in my school district. We are very rural and have a high percentage of low income residents. This is true even in good economic times, but these day, many of our parents, guardians and community members are struggling to keep their phone service on, let alone Internet service. With this rule in place, we could offer access computers and the Internet to our community, with no additional cost to our district or the Erate program.
